A three-month Digital Marketing internship which focused on google advertisement and other digital advertisements, search engine optimization included.

PROJECTS

PARKING LOT MANAGEMENT SYSTEM (ANDROID APP)

A parking lot management system (PMS) is for managing the records of the incoming and outgoing vehicles in a parking house or area. The project significantly reduces manual effort by analyzing the vehicle data at the entry point and stores it in the database. The objective of this project is to build a Vehicle Parking lot management system that enables the time management and control of vehicles using tokens.
